Windows Driver Software for Classembly Devices(R) FBWF Memory Watcher

概要

FBWF Memory Watcher is software to monitor disk space that File-Based Write Filter (FBWF) consumes in an Interface Classembly DevicesR by applications running on Windows. Application software links a provided dynamic link library (DLL) and monitors them through the application programming interface (API). The FBWF Memory Watcher utility program included in this software configures and monitors the disk space that FBWF consumes with Graphical User Interface (GUI).

特長

- The software monitors free disk space of FBWF to ensure system stability.
- An interrupt event is generated when the free disc space of FBWF becomes less than the specified value.
- The free disk space of FBWF can be confirmed with GUI utility program. A warning balloon appears when the free disk space of FBWF exceeds the threshold value.

対応 OS

Windows Embedded Standard 2009

対応言語
