DPF-0216	EWF Management software

概要
The EWF Management Software includes Interface EWF Manager and Memory Monitoring library. Interface EWF Manager configures EWF (Enhanced Write Filter) settings and monitors each memory with GUI (Graphical User Interface). Memory Monitoring library monitors the disk space that EWF consumes from your application software running on Windows. Application software links a provided DLL (dynamic link library) and monitors the disk space that EWF consumes through the API (application programming interface).

特長
- You can easily configure EWF with the GUI utility program.   - The disk space that EWF consumes and physical free disk space can be confirmed with the GUI utility program. When the values exceed the threshold value, a warning message will appear.   - This software retrieves the status of disk space that EWF consumes and physical disk space with the library.   - This software notifies an event when the disk space that EWF consumes exceeds the threshold value. A cycle to check whether the disk space is exceeds the threshold value can be specified in ms.

対応 OS
Windows Embedded Standard 7

対応言語
Microsoft Visual C++ 6.0   Microsoft Visual Basic 6.0
